

INTERNATIONAL OZONE DAY

(Under ECO-CLUB)

16 September 2022

The Montreal Protocol on substances that deplete the Ozone Layer in the atmosphere is one of the most important and effective global agreement with 197 member countries of United Nations till today. It was signed on 16 September, 1987. Since 1995, this day is commemorate as the International Ozone Day. Necessary efforts have been undertaken throughout the world to phase out ozone-depleting substances and as a result, the hole in the ozone layer is healing leading towards protection of human health, economies and ecosystems. Beside this, the Montreal Protocol has also highlighted on climate change and helped to boost up energy efficiency in the cooling sector, which contributes to food security.

The theme for this year is- 'Montreal Protocol – keeping us, our food and vaccines cool. On 16 September, 2022 Institute Of Vocational Studies celebrated Ozone day. This session was conducted under variant activities by following the proper forum. The objective was to create awareness amongst the stakeholders Including industries, general public, students, teachers etc. About phasing out of ODSs in Order to protect the Ozone Layer. A number of students, teachers and other people joined the program.

Anchors welcomed all the participants and explained about the significance of celebrating the World Ozone Day and how to protect it by discarding some of the daily used items containing HFCs.

Some students described the scientific overview and environmental impact or Importance of ozone layer as the key speaker.

After the speeches, the students interacted with speakers during the question-answer session. After that a quiz competition was organized in which all the students participated enthusiastically. In the Quiz, the professor asked the students to participate in the quiz and announced the winner. All the students enjoyed the program very much.
