

ACTIVITY: REUSE OF PLASTIC

DATE: 10-06-2022

Our mother Earth gave birth to the entire universe, hence it's our duty to protect it. Recycling and reusing of plastics is essential in today's world. Plastic, being a non-biodegradable material, takes several decades to degrade enough to be reused again. By reusing plastic for daily use, awareness of plastic landfills, sea fills, and environmental issues can be spread and controlled. The more people that are open to using reused plastic products, the better it will be for the world. Keeping this in mind, Institute of Vocational Studies organized an activity on Reuse of Plastic for the students of B.Ed. on 10th June 2022. The objective of the activity was to introduce the concept of the three Rs and sustainable development goals. Students were asked to express their ideas through craft work such as pen stands, bottle planters etc. The activity was conducted under the guidance of our respected Principal Dr. Mandira Gupta and was organized by Ms. Sangeeta Kaushik.

The students displayed their artistic skills and worked with a lot of zeal and enthusiasm to protect our Mother Earth. It was indeed a purposeful activity. The activity also helped the students to think critically and creatively and they enjoyed thoroughly.

GLIMPSES OF ACTIVITY

Students performed the activity with great enthusiasm. Principle ma'am appreciated the efforts of the students and motivated them. Faculty members also appreciated the students. Everyone enjoyed the activity.
